A new Nando's restaurant for Exeter. Protected with ProRender silicone through-coloured render

PROREND

Nando's Alphington Park, Exeter

RENDER FOR RETAIL

This new-build restaurant in Alphington Park Exeter was designed by CAD Architecture of Manchester and constructed by south west company Pollard.

This £1 million development is located in an industrial area on a busy approach road to the city. The rendered elevations soften the appearance, complementing other materials and giving a welcoming feel. The architect chose neutral

colours for the background to the red of the Nando's signage making it stand out to passing traffic. The render sits alongside brick, wooden cladding and a metal louvered canopy.

GREAT FINISH WITH SAS PRODUCTS

The applicators CMP Plastering have achieved a neat finish, using ProRender Colour render and ProBead render beads for sharp corners and edges and to provide expansion breaks over larger areas. This detail reduces stress on the render to prevent cracking, ensuring a low maintenance exterior.

PROREND COLOUR RENDER

ProRend Colour is a premium through-coloured render available in a range of 16 colours - just ask if you would like a free sample.

ProRend Colour render is ideal for blockwork and is easy to apply in one coat, either machine sprayed or by hand. Perfect for large commercial developments as well as a great finish for residential projects.

ProRend renders are highly water resistant and easy to clean with just a pressure washer. This retail unit will have a long-lasting render finish in this high-traffic location.

Nando's Exeter

ABOUT SAS EUROPE

You can order the ProRend range of render products direct from the UK manufacturer. SAS Europe offer a range of services and can provide guidance on estimating quantities, thermal qualities and decorative finish.

Our technical team offer unrivalled support throughout the construction process, from design to application. We can recommend contractors who are trained to our high standards and provide guarantees for a complete solution.
